INDEX TO VOLUME 24, 1970

Acmaea digitalis, shell pattern and behavior polymorphism, 98
Adaptation, gas exchange, 723
metabolic, *Hyla regilla*, 75
to heterogeneous environments, *Oenothera*, 578
Adaptive chromosomal polymorphism, Payne inversion, *Drosophila melanogaster*, 181
Adaptive radiation, bill morphology, feeding habits, Hawaiian honeycreepers, 704
Oenothera, 578
Adaptive value, hybridogenetic mechanism, 789
Aedes aegypti, mascarensis, hybrid breakdown, 692
Africa, genetic basis of crossing barriers, rice, 135
Agaonidae, host specificity, 680
Allelism, among lethal chromosomes, *Drosophila melanogaster*, 507
Anthoxanthum odoratum, interpopulational difference in response to a mosaic environment, 257
Anthropoids, evolutionary basis for aesthetic appreciation, 477, 824
Apis mellifera adansonii, ligustica, reproductive isolation, 145
Apomixis, *Dichanthium*, 270
Armeria maritima, variation in breeding systems, 571
Australia, adaptive shifts in reproductive patterns, leptodactylid frogs, 643
phenotypic variation in *Dacus*, 320
Autotrophism, mechanisms of selection for, annual grassland hemiparasites, 278
B-chromosome system, mottled grasshopper, 169
Behavior, pair cooperation, *Panterpe insignis*, 759
polymorphism, *Acmaea digitalis*, 98
post-copulatory, passive phase, *Scatophaga stercoraria* (Diptera), 774
social, pinnipeds, 546
Behavioral traits, effect on genetic structure of populations, 90
Birds, adaptive radiation in Hawaiian honeycreepers, 704
ecotypic variation, 829
origin, 448
taxon cycle, distribution, Jamaica, 475
Bromus mollis, genetic variability in natural populations, 649
Butterflies, habitat selection, competition, *Lethe eurydice, appalachia, portlandia*, 48
Camissonia dentata subspecies, distribution, cytogenetics, 816
Canada, sexual size dimorphism, sandpipers, 311
Caves, factors affecting species diversity, 463
Centrarchidae, gonads and reproduction of hybrids, 378
Character conservatism, weighting, relation to rate of evolution, 825
Character convergence, associated with interspecific territoriality, Mexican finches, 304
Cheetham, A. H., morphology and systematics of *Metrarabdotos*, book review, 481
Chromosomal abnormalities, mechanisms for evolution by aneuploidy and polyploidy, *Mimulus glabratus* complex, 670
Chromosomes, arrangements, fitness, *Drosophila persimilis*, 495
delta-associating, *Drosophila melanogaster*, 735
lethal and semilethal, *Drosophila melanogaster*, 507
number, progeny of pentaploid potato hybrid, 745
repatterning, *Camissonia* (Onagraceae), 816
Payne inversion, *Drosophila melanogaster*, 181
polymorphism, *Drosophila paulistorum* semispecies, 519
Coat color, distribution and selection of phenotypes, *Neotoma lepida*, 560
Competition, among satyrid butterflies, 48
between *Drosophila funebris, virilis*, 528
effects of nutrition, *Drosophila melanogaster, simulans*, 531
interspecific, *Drosophila serrata*, 483
Competitive exclusion, plethodontid salamanders, 632
Convergence, character, Mexican finches, 304
egg-size, morphs of *Haemonchus contortus* (Nematoda), 625
Convergent evolution, sclerophyll shrubs, 292
Costa Rica, evolution of pair cooperation, *Panterpe insignis*, 759
Crossing behavior, diploid members of *Mimulus glabratus* complex, 670
Cuscuta (Convolvulaceae), genome reduction associated with parasitism, 207, 796
Cytogenetics, amphitropical affinities, *Camissonia dentata*, 816
Cytogenetic relationships, diploid members of *Mimulus glabratus* complex, 670
Cytology, progeny of pentaploid potato hybrid, 745
Cytoplasmic factors in cultivated potato evolution, 188
Cytoplasmically-inherited factors, comparison of cultivated potato and diploid progenitors, 750
Dacus oleae, relation between esterase genotypes and survival to dimethoate, 807
Dacus, phenotypic variation, 320
Developmental stability, effect of hybridization, *Liatris*, 613
Dichanthium, apomixis, polyploidy, speciation, 270
Dimorphism, phenotypic, *Phlox pilosa*, 128
Dioecy, evolution from gynodioecy, 827
Discriminant analysis, 220
Dispersal, effects on gene frequencies, 90
influence of pollination specificity, *Ficus*, 680
Disruptive selection, maintenance of shell pattern polymorphism, *Acmaea digitalis*, 98
Distribution, B-chromosome system, mottled grasshopper, 169
birds, Jamaica, 475
geographical, coat color phenotypes, *Neotoma lepida*, 560
shell pattern morphs, *Acmaea digitalis*, 98

INDEX TO VOLUME 24, 1970

Acmaea digitalis, shell pattern and behavior polymorphism, 98
Adaptation, gas exchange, 723
metabolic, *Hyla regilla*, 75
to heterogeneous environments, *Oenothera*, 578
Adaptive chromosomal polymorphism, Payne inversion, *Drosophila melanogaster*, 181
Adaptive radiation, bill morphology, feeding habits, Hawaiian honeycreepers, 704

Apomixis, *Dichanthium*, 270
Armeria maritima, variation in breeding systems, 571
Australia, adaptive shifts in reproductive patterns, leptodactylid frogs, 643
phenotypic variation in *Dacus*, 320
Autotrophism, mechanisms of selection for, annual grassland hemiparasites, 278
B-chromosome system, mottled grasshopper, 169
Behavior, pair cooperation, *Panterpe insignis*, 759
polymorphism, *Acmaea digitalis*, 98
post-copulatory, passive phase, *Scatophaga stercoraria* (Diptera), 774
social, pinnipeds, 546
Behavioral traits, effect on genetic structure of populations, 90
Birds, adaptive radiation in Hawaiian honeycreepers, 704
ecotypic variation, 829
origin, 448
taxon cycle, distribution, Jamaica, 475
Bromus mollis, genetic variability in natural populations, 649
Butterflies, habitat selection, competition, *Lethe eurydice, appalachia, portlandia*, 48
Camissonia dentata subspecies, distribution, cytogenetics, 816
Canada, sexual size dimorphism, sandpipers, 311
Caves, factors affecting species diversity, 463
Centrarchidae, gonads and reproduction of hybrids, 378
Character conservatism, weighting, relation to rate of evolution, 825
Character convergence, associated with interspecific territoriality, Mexican finches, 304
Cheetham, A. H., morphology and systematics of *Metrarabdotos*, book review, 481
Chromosomal abnormalities, mechanisms for evolution by aneuploidy and polyploidy, *Mimulus glabratus* complex, 670
Chromosomes, arrangements, fitness, *Drosophila persimilis*, 495
delta-associating, *Drosophila melanogaster*, 735
lethal and semilethal, *Drosophila melanogaster*, 507
number, progeny of pentaploid potato hybrid, 745
repatterning, *Camissonia* (Onagraceae), 816
Payne inversion, *Drosophila melanogaster*, 181
polymorphism, *Drosophila paulistorum* semispecies, 519
Coat color, distribution and selection of phenotypes, *Neotoma lepida*, 560
Competition, among satyrid butterflies, 48
between *Drosophila funebris, virilis*, 528
effects of nutrition, *Drosophila melanogaster, simulans*, 531
interspecific, *Drosophila serrata*, 483
Competitive exclusion, plethodontid salamanders, 632
Convergence, character, Mexican finches, 304
egg-size, morphs of *Haemonchus contortus* (Nematoda), 625
Convergent evolution, sclerophyll shrubs, 292
Costa Rica, evolution of pair cooperation, *Panterpe insignis*, 759
Crossing behavior, diploid members of *Mimulus glabratus* complex, 670
Cuscuta (Convolvulaceae), genome reduction associated with parasitism, 207, 796
Cytogenetics, amphitropical affinities, *Camissonia dentata*, 816
Cytogenetic relationships, diploid members of *Mimulus glabratus* complex, 670
Cytology, progeny of pentaploid potato hybrid, 745
Cytoplasmic factors in cultivated potato evolution, 188
Cytoplasmically-inherited factors, comparison of cultivated potato and diploid progenitors, 750
Dacus oleae, relation between esterase genotypes and survival to dimethoate, 807
Dacus, phenotypic variation, 320
Developmental stability, effect of hybridization, *Liatris*, 613
Dichanthium, apomixis, polyploidy, speciation, 270
Dimorphism, phenotypic, *Phlox pilosa*, 128
Dioecy, evolution from gynodioecy, 827
Discriminant analysis, 220
Dispersal, effects on gene frequencies, 90
influence of pollination specificity, *Ficus*, 680
Disruptive selection, maintenance of shell pattern polymorphism, *Acmaea digitalis*, 98
Distribution, B-chromosome system, mottled grasshopper, 169
birds, Jamaica, 475
geographical, coat color phenotypes, *Neotoma lepida*, 560
shell pattern morphs, *Acmaea digitalis*, 98

Divergence, morphologic, white-tailed deer, 220
Diversification, hypothesis, plankton, 1
DNA, hybridization, *in vitro* techniques, 207
interspecific comparisons among rodents, 199
rates of renaturation in parasites and free-living forms, 796
Dobzhansky, Th., and E. Boesiger, essays on evolution, book review, 480
Drosophila birchii, reproductive isolation between geographic strains, 149
funebris, *virilis*, fitness components, competition, 528
melanogaster, delta-associating chromosomes in a natural population, 735
distribution of gene frequencies in polymorphic populations, 660
frequency of lethal and semilethal chromosomes, South Amherst population, 507
interaction between chromosomal inversion and genetic background, 181
simulans, effects of nutrition on competitive ability, 531
paulistorum, biometrical study of semispecies, 156
new semispecies, Interior, 519
persimilis, fitness of chromosomal polymorphs, 495
serrata, fitness of geographic strains, 483
Ecogenetics, *Bromus mollis*, 649
Ecological diversity, relation to taxonomic diversity, islands, 23
Ecotypic variation, intra-, interspecific, Fringillidae, 829
Electrophoresis, esterase, *Dacus oleae*, 807
Drosophila paulistorum semispecies, 519
isozymes, rice, 344
protein, *Limulus polyphemus*, 402
Partula (Gastropoda), 424
seed protein, *Gossypium*, 431
Essays on Evolution, by Th. Dobzhansky and E. Boesiger, book review, 480
Evolution, adaptability, *Anthoxanthum odoratum*, 257
agamospecies, *Dichanthium*, 270
Aves, 448
B-chromosome system, mottled grasshopper, 169
cultivated potato, 188, 750
dioecy from gynodioecy, 827
essays, book review, 480
mechanisms, *Mimulus glabratus* complex, 670
mimetic polymorphisms, 395
natural populations, *Drosophila melanogaster*, *simulans*, 531
pair cooperation, *Panterpe insignis*, 759
parasitism, genetic basis of parasitic reduction, 796
pinniped polygyny, model, 546
plankton groups, 1
post-copulatory passive phase, *Scatophaga stercoraria* (Diptera), 774
postcranial skeleton, cynodonts, 230
rate, relationship of variation and conservatism, 825
reproductive strategies, lizards, 55
Pithecellobium, *Enterolobium*, 253
respiratory systems, early tetrapods, 723
synthetic theory, 704
theory accommodating prezygotic selection and meiotic drive, 415
Evolutionary basis for aesthetic appreciation in anthropoids, 477, 824
Evolutionary history, plankton, 1
Evolutionary relationships, *Oenothera avita*, *deltoides*, *wigginsii*, 578
Evolutionary state, reproductive organs, Lagomorpha, 479
Evolutionary strategies, Mediterranean-climate sclerophyll shrubs, 292
Extinction, hypothesis, plankton, 1
resulting from competitive exclusion, plethodontid salamanders, 632
Faunal diversity, caves, 463
Fertility, *Lupinus nanus* genotypes, 120
Figs, host specificity of fig wasps (Agaonidae), 680
Finches, character convergence associated with interspecific territoriality, 304
Fitness, autotrophic capacity and genetic variability, annual grassland hemiparasites, 278
components, fecundity, longevity, *Drosophila funebris*, *virilis*, 528
corolla color phases, *Phlox pilosa*, 128
effects of prezygotic selection and meiotic drive, 415
larval viability, body weight, *Drosophila melanogaster*, *simulans*, 531
Lupinus nanus genotypes, 120
measured by interspecific competition, geographic strains of *Drosophila serrata*, 483
population size, associated with gene frequency, *Drosophila melanogaster*, 660
related to chromosomal inversion, *Drosophila melanogaster*, 181
Floral attributes, *Liatris* species and hybrids, 613
Fossil record, cynodonts, 230
ornithischian dinosaurs, 448
plankton, 1
Fringillidae, ecotypic variation, 829
Gene-cytoplasm interactions, cultivated potato, diploid ancestors, 750
Gene exchange, interspecific, *Phlox*, 367
Gene flow, effects of mating systems, *Phaseolus*, 356
Gene frequency, effects of dispersion, imprinting, model, 90
rate of change in polymorphic populations, *Drosophila melanogaster*, 660
Genetic barriers, rice, 135
Genetic basis of parasitic reduction, measured by DNA renaturation, 796
Genetic constitution, rice hybrids, 344
Genetic structure of semi-isolated populations, effects of dispersion, imprinting, model, 90
Genetic variability, effects of reproductive pat-

terns, *Orthocarpus*, 598
within- and between-families, *Bromus mollis*, 649
Genic heterozygosity, *Limulus polyphemus*, 402
Genome, banding patterns, *Gossypium*, 431
reduction, *Cuscuta* (Convolvulaceae), 207
size, measured by DNA renaturation, 796
Genotype frequency, outcrossing, *Lupinus nanus*, 120
Geographical differentiation, *Bromus mollis*, 649
Geographical distribution, *Camissonia dentata* subspecies, 816
plethodontid salamanders, 632
Poeciliopsis monacha-occidentalis in relation to its "host" species, 789
Geographical variation, coat color, *Neotoma lepida*, 560
evolution, *Oenothera*, 578
intraspecific, *Orthocarpus*, 598
protein polymorphism, *Limulus polyphemus*, 402
within *Drosophila paulistorum* complex, 156
Gonads, sunfish hybrids, 378
Gossypium, seed proteins, 431
Grass, interpopulational differences in response to a mosaic environment, 257
Gynodioecy, stage in evolution of dioecy, 827
Habitat selection, satyrid butterflies, 48
Haemonchus contortus (Nematoda), polymorphism, egg-size, 625
Hawaiian Islands, adaptive radiation, honeycreepers, 704
Hemiparasites, effects of reproductive patterns on genetic variability, *Orthocarpus*, 598
facultative heterotrophism, 278
Heterotrophism, facultative, annual grassland hemiparasites, 278
Homology, ornithischian pubis, 448
Host specificity, fig wasps (Agaonidae), 680
Hybrid breakdown, isolating mechanism between *Aedes aegypti* and *A. mascarensis*, 692
Hybrid sterility, sunfish, 378
Hybridization, interspecific, *Orthocarpus*, 598
Hybridogenesis in *Poeciliopsis*, 789
Hyla regilla, metabolic adaptation to heterogeneous environments, 75
Immigration, effects on frequency of coat color phenotypes, *Neotoma lepida*, 560
Imprinting, mate selection, effects on gene frequencies, 90
Insecticide, organophosphate, differential mortality of esterase genotypes, *Dacus oleae*, 807
Insular biogeography, 23
Interspecific competition, measure of fitness, *Drosophila serrata*, 483
Introgression, effects of mating systems, *Phaseolus*, 356
warblers, 254
wild and cultivated rice, 344
Island biotas, taxonomic diversity, 23
Isolation, genetic, between divergent populations of *Odocoileus virginianus*, 220
rice, 135
mechanisms, sunfish, 378
warblers, 254
reproductive, *Aedes aegypti, mascarensis*, 692
between African and Italian bees, 145
between geographic strains of *Drosophila birchii*, 149
chromosome abnormalities as barriers to gene exchange, *Mimulus glabratus* complex, 670
Drosophila paulistorum semispecies, 519
rice, 344
sexual, *Dacus*, 320
Jamaica, stage of taxon cycle, distribution, birds, 475
Karyotypes, *Drosophila persimilis*, 495
Lagomorpha, evolutionary state of reproductive organs, 479
Leptodactylid frogs, parallel evolution of reproductive patterns, 643
Lethal and semilethal chromosomes, changes in frequency, *Drosophila melanogaster*, 507
Lethe eurydice, appalachia, portlandia, habitat selection, competition, 48
Liatris, developmental stability in species and hybrids, 613
Life history, *Haemonchus contortus* (Nematoda), 625
Panterpe insignis, 759
Limulus polyphemus, genetic variation, 402
Lizards, evolution of reproductive strategies, 55
Lupinus nanus, selective disadvantage of flower color mutant, 120
Mammals, interspecific DNA comparisons among rodents, 199
metachromism, 644
Mathematical ecology, book review, 482
Mating, assortative, sandpipers, 311
Mating propensity, *Drosophila persimilis* karyotypes, 495
Mating systems, effect on introgression, *Phaseolus*, 356
variation, *Armeria maritima*, 571
Meiotic drive, population genetics model, 538
Metabolic adaptation, *Hyla regilla*, 75
Metachromism, mammals, 644
Metrarabdotos (Ectoprocta), morphology, systematics, book review, 481
Mexico, character convergence, finches, 304
distribution, adaptation, origin, *Poeciliopsis monacha-occidentalis*, 789
progeny of pentaploid potato, 745
Microevolutionary sequences, a fundamental concept in macroevolutionary models, 704
Mimicry, maintenance of polymorphism, frequency-dependent selection, 395
Mimulus glabratus complex, cytogenetic relationships of diploids, 670
Monotremes, physiology, anatomy, compared with therians, 230
Moorea, protein variation, taxonomy, *Partula* (Gastropoda), 424
Morphology, *Metrarabdotos*, book review, 481

respiratory systems, amphibians and fishes, 723
skull, white-tailed deer, 220
wild potatoes, 745
Mortality, differential, esterase genotypes, *Dacus oleae*, 807
Mosquitoes, hybrid breakdown between *Aedes aegypti* and *A. mascarensis*, 692
Mutant flower color, selective disadvantage, *Lupinus nanus*, 120
Myrmeleotettix maculatus, dynamics of B-chromosome system, 169
Natural populations, dimorphism, fitness, *Phlox*, 128
Drosophila melanogaster, *simulans*, 531
effects of reproductive patterns on genetic variability, *Orthocarpus*, 598
exploitation of pollinators by *Phlox*, 367
fitness of chromosomal polymorphs, *Drosophila persimilis*, 495
genetic variability in *Bromus mollis*, 649
genotypic and phenotypic variation in response to soil types, *Anthoxanthum odoratum*, 257
Lupinus nanus, 120
maintenance of recessive lethals, *Drosophila melanogaster*, 507
phenotypic variation, *Dacus*, 320
protein variation, *Partula* (Gastropoda), 424
variation in delta-associating chromosomes, *Drosophila melanogaster*, 735
Natural selection, chromosomal polymorphism, *Drosophila persimilis*, 495
egg-size, *Haemonchus contortus* (Nematoda), 625
theorem extended to include non-Mendelian segregation, 415
Neotoma lepida, distribution and selection of coat color phenotypes, 560
Non-Mendelian segregation, multiple alleles, model, 415
population genetics model, 538
Nutrition, effects on competition between *Drosophila melanogaster*, *simulans*, 531
Odocoileus virginianus, intraspecific morphological divergence, 220
Oenothera, speciation, 578
Origin, birds, 448
Gossypium, 431
hybridogenetic diploid unisexual, *Poeciliopsis monacha-occidentalis*, 789
post-copulatory passive phase, *Scatophaga stercoraria* (Diptera), 774
Orthocarpus, reproductive patterns, genetic variability, 598
Oryza perennis barthii, genetic basis of crossing barriers, 135
Osteology, ornithischian dinosaurs, birds, 448
postcranial, cynodonts, 230
Outcrossing, genotype frequency, *Lupinus nanus*, 120
rates in natural populations, *Bromus mollis*, 649
Pair cooperation, *Panterpe insignis*, 759
Pair formation, sexual size differences, sandpipers, 311
Panterpe insignis, evolution of pair cooperation, 759
Parallel evolution, adaptive ecology, leptodactylid frogs, 643
Parasitic reduction, genetic basis determined by DNA renaturation, 796
Parasitism, genome reduction in *Cuscuta* (Convolvulaceae), 207
Payne inversion, adaptive polymorphism, *Drosophila melanogaster*, 181
Phaseolus, effects of mating systems on introgression, 356
Phenotypic variance, effects of mating systems, *Phaseolus*, 356
Phlox, exploitation of pollinators, 367
pilosa, phenotypic dimorphism, fitness, 128
Phylogeny, pinnipeds, 546
Phytogeography, *Camissonia* (Onagraceae), 816
Pielou, E. C., mathematical ecology, book review, 482
Pimelea (Thymeleaceae), evolution of dioecy from gynodioecy, 827
Pinnipeds, evolution of polygyny, 546
Plankton, evolution, 1
Plethodon, micro-geographic distribution, competitive exclusion, 632
Plethodontid salamanders, micro-geographic distribution, competitive exclusion, 632
Poeciliopsis monacha-occidentalis, hybridogenetic origin, distribution, 789
Pollen load, components, *Phlox* species and hybrids, 367
Pollination specificity, fig wasps (Agaonidae), 680
Pollinator attractiveness, measure of fitness, corolla color phases, *Phlox pilosa*, 128
Pollinators, exploitation by *Phlox* species and hybrids, 367
Polygyny, patterns, pinnipeds, 546
Polymorphism, at the lemma pubescence locus, *Bromus mollis*, 649
chromosomal, *Drosophila melanogaster*, 181
Drosophila paulistorum semispecies, 519
Drosophila persimilis, 495
Myrmeleotettix maculatus (Orthoptera), 169
Oenothera, 578
progeny of pentaploid potato hybrid, 745
eye color, population size and gene frequency, *Drosophila melanogaster*, 660
genes A and B, *Dacus oleae*, 807
genetic, *Dichanthium*, 270
mimetic, 395
phenotypic, *Haemonchus contortus* (Nematoda), 625
protein, *Limulus polyphemus*, 402
shell pattern, behavior, *Acmaea digitalis*, 98
Polyploidy, *Dichanthium*, 270
origin, *Gossypium*, 431

CONTENTS OF VOLUME 24

ALI, A. M. M. (See El-Helw, M. R.) 531

ATSATT, P. R., AND DONALD R. STRONG. The Population Biology of Annual Grassland Hemiparasites. I. The Host Environment. 278

ATSATT, P. R. The Population Biology of Annual Grassland Hemiparasites. II. Reproductive Patterns in *Orthocarpus*. 598

AYALA, FRANCISCO J. Population Fitness of Geographic Strains of *Drosophila serrata* as Measured by Interspecific Competition. 483

BAIMAI, VISUT. Additional Evidence on Sexual Isolation within *Drosophila birchii*. 149

BAKER, HERBERT G. (See Hatheway, William H.) 253

BANKS, RICHARD C. On Ecotypic Variation in Birds. 829

BARTHOLOMEW, GEORGE A. A Model for the Evolution of Pinniped Polygyny. 546

BIRCH, L. C., AND W. G. VOGT. Plasticity of Taxonomic Characters of the Queensland Fruit Flies *Dacus tryoni* and *Dacus neohumeralis* (Tephritidae). 320

BLEAKNEY, J. SHERMAN. A Possible Evolutionary Basis for Aesthetic Appreciation in Men and Apes. 477

BOCK, WALTER J. Microevolutionary Sequences as a Fundamental Concept in Macroevolutionary Models. 704

BROWN, JAMES H. (See Cody, Martin L.) 304

BUENO, DAVID. (See Kerr, Warwick Estevam) 145

CARDE, RING T. (See Shapiro, Arthur M.) 48

CHERRY, J. P., F. R. H. KATTERMAN, AND J. E. ENDRIZZI. Comparative Studies of Seed Proteins of Species of *Gossypium* by Gel Electrophoresis. 431

CHU, YAW-EN, AND HIKO-ICHI OKA. The Genetic Basis of Crossing Barriers between *Oryza perennis* subsp. *barthii* and its Related Taxa. 135

CHU, YAW-EN, AND HIKO-ICHI OKA. Introgression Across Isolating Barriers in Wild and Cultivated *Oryza* Species. 344

CODY, MARTIN L., AND JAMES H. BROWN. Character Convergence in Mexican Finches. 304

CRAIG, G. B., JR. (See Hartberg, W. K.) 692

CROFTON, H. D. (See LeJambre, Leo F.) 625

CULVER, DAVID C. Analysis of Simple Cave Communities. I. Caves as Islands. 463

DE WET, J. M. J., AND J. R. HARLAN. Apomixis, Polyploidy, and Speciation in *Dichanthium*. 270

DIXON, R. D. (See Seiger, Marvin Barr) 90

DOBZHANSKY, TH. (See Perez-Salas, S.) 519

DUNN, E. LLOYD. (See Mooney, Harold A.) 292

EHRMAN, L. (See Perez-Salas, S.) 519

EL-HELW, M. R., AND A. M. M. ALI. Competition between *Drosophila melanogaster* and *D. simulans* on Media Supplemented with *Saccharomyces* and *Schizosaccharomyces*. 531

EL-WAKIL, H. M. (See Tantawy, A. O.) 528

ENDRIZZI, J. E. (See Cherry, J. P.) 431

FARRIS, JAMES S. On the Relationship between Variation and Conservatism. 825

FICKEN, MILLICENT S., AND ROBERT W. FICKEN. Comments on Introgression and Reproductive Isolating Mechanisms in the Blue-Winged Warbler–Golden-Winged Warbler Complex. 254

FUJIOKA, NOBUKO. (See Minamori, Sumio) 735

GALTON, PETER M. Ornithischian Dinosaurs and the Origin of Birds. 448

GANS, CARL. Respiration in Early Tetrapods—The Frog is a Red Herring. 723

GIESEL, JAMES T. On the Maintenance of a Shell Pattern and Behavior Polymorphism in *Acmea digitalis*, a Limpet. 98

GRUN, PAUL. Changes of Cytoplasmic Factors During the Evolution of the Cultivated Potato. 188

GRUN, PAUL. Cytoplasmic Sterilities that Separate the Cultivated Potato from its Putative Diploid Ancestors. 750

HARDING, JAMES. Genetics of *Lupinus*. II. The Selective Disadvantage of the Pink Flower Color Mutant in *Lupinus nanus*. 120

HARTBERG, W. K., AND G. B. CRAIG, JR. Reproductive Isolation in *Stegomyia* Mosquitoes. II. Hybrid Breakdown between *Aedes aegypti* and *A. mascarensis*. 692

HARTL, DANIEL L. Population Consequences of Non-Mendelian Segregation among Multiple Alleles. 415

HARTL, D. L. Analysis of a General Population Genetic Model of Meiotic Drive. 538
